Summary

Frontend-focused developer with 3+ years of experience building SaaS applications and hands-on experience across the MERN stack. I enjoy taking ownership of a feature from start to finish—whether that means optimizing a React interface or wiring up a secure Node.js backend. I thrive in fast-paced environments where I can work closely with designers and product teams to build tools that people actually want to use.

Work

Frontend Developer, *Sprie (Percept Imagery)* 12/2022 – 09/2026 | Ahmedabad, India

- Developed Customer and Admin dashboards for Sprie using CoreUI (React), delivering a seamless and responsive user experience.
- Implemented data analytics dashboards with smart tables, charts, calendar integration, search, and pagination to improve business insights.
- Integrated AR model and virtual try-on (VTO) previews to dashboards, enhancing product visualization.
- Built SprieLive, a real-time virtual demo tool that allows client to preview products to their potential customers.

Projects

Read Later App (AI Summarizer), , *Tech Stack: Next.js, Better Auth* 07/2026 – 08/2026

- Built an AI-powered tool that help users quickly pull the key takeaways out of long, cluttered tech blogs.
- Used React 19's new useActionState and Server Actions to handle form data natively, keeping the frontend fast and lightweight without relying on extra state management libraries.
- Integrated Better Auth for secure logins and fine-tuned the UI to feel snappy, fixing visual glitches like hydration flashes and adding smooth loading skeletons so the app never feels frozen.

FlowPay (Payment App) 09/2025 – 11/2025

Tech Stack: React, Node.js, TypeScript, Tailwind CSS, MongoDB, Express.js, JWT

- Developed a secure, full-stack MERN application that enables users to search for friends, manage their balances, and execute peer-to-peer money transfers.
- Handled complex database operations by implementing MongoDB transactions (ACID properties), ensuring that money transfers are perfectly synced and no funds are lost if a network error occurs mid-transfer.
- Secured the application with custom JWT-based authentication and strict Zod validation on the backend APIs to protect sensitive user financial data.

PetSoft (Pet care stays organized) 04/2025 – 06/2025

Tech Stack: Next.js, Prisma, PostgreSQL, NextAuth, Stripe

- Built a full-stack SaaS platform using the Next.js App Router and Server Actions, allowing pet daycare owners to seamlessly manage, track, and update pet details in real time.
- Implemented secure user authentication with NextAuth and integrated Stripe for smooth payment processing, handling edge cases to ensure reliable transactions.
- Created a highly responsive and accessible UI using Tailwind CSS and Shadcn UI, utilizing React's useOptimistic hook to provide instant visual feedback when users submit forms.
- Engineered backend structure using Prisma ORM with PostgreSQL, validating all incoming data with Zod and React Hook Form to prevent database errors and bad inputs.

Skills

Frontend: React | Next.js | TypeScript | Tailwind CSS

Backend: Nodejs | Express | Prisma

Database: MongoDB | ProstgreSQL

Tools & Others: Git | GitHub | Postman | Vercel | Render

Education

B.Sc. Chemistry, *L.J. University* 2018 – 2021 | Ahmedabad, India

Science, *Seventh Day Adventist School* 2018 | Ahmedabad, India
